

Summary of PRAYER WAVES for April 2018

Daniel Caballero

One of the big things that Daniel has been doing is to try and bring flexible training to those who need training for ministry but cannot take the time to go to a traditional Bible College. To do this a group that includes Daniel has set up an online Bible College.

The online college is based on a Spanish translation of the Moore College course from Australia. The reading, material and assessments are all from Moore College while the online lectures are done by Daniel and other local teachers.

At the moment the course has about 76 students who are studying for accreditation, however, there are thousands of people all over South America who are watching the videos that are available over multiple social media platforms, such as Facebook and Instagram.

Daniel is also involved in an online blog. The purpose of the blog is to write articles according to the needs and context of Latin America. The blog has about 65,000 subscribers who read and share the articles all over South America.

The articles on the blog are very varied. Some of them are written by local pastors like Daniel, some are translated from contemporary sources such as the Gospel Coalition and some are translated from the works of the Puritans. Daniel is also involved in a book publisher that seeks to produce good literature in Spanish. Their first book is a collection of academic essays on the theology of John Owen.

Daniel gets married to Ellie in May and then is seeking to study a PhD in the UK to aid in his current and future projects of training up pastors and producing good Christian literature in Spanish.

Prayer Points:

- **Pray for Daniel and Ellie as they get married in May.**
- **Pray for Daniel's plans for the future as he seeks to do a PhD.**
- **Pray for the online training course, that it will equip and train up faithful ministers in Peru.**
- **Pray for the publishing of books in Peru. That good Christian literature will be able to be made available in Spanish.**
